

Nest & Stack Boxes • Soaking, Storing, Draining, Moving

These convenient Boxes are lightweight, yet strong as steel on a weight ratio. Nest & Stack Boxes offer the unique feature of stacking, with or without covers. Ideal for thawing or storing frozen meat, poultry or fish. When used with a matching solid Nest & Stack Box, the Nest & Stack Drain Box allows liquid to drain and collect away from the product. A matching dolly under the stack makes a mobile stack for easy movement. Keep prepared vegetables fresh in your walk in and have the ability to move them with ease. These boxes can also be used for pre-soak boxes to soak food particles from flatware, dishes, or other utensils before dishwashing. Two-piece construction allows water and particles to collect in the bottom box. Lifting the insert box with holes in the bottom allows water and small food particles to flush through the drain areas. Boxes, covers and dollies combine to form a convenient transport system yet take up only 1/4 of their stack height when nested for storage.

Molded of Reinforced Thermoset Polyester Composite Material, these boxes are resistant to detergents and pre-soak chemicals and are easily rinsed clean. These Boxes are not affected by freezer temperature and can withstand heat up to 300°F.
