

MFG - Stacking Containers & Trays

MFG Tray Co. offers the broadest line of reinforced composite stacking trays and boxes. These products are dimensionally stable, strong, and will not sag or bend. Reinforced composite material gives you a container that can easily take hot castings right out of the mold. Castings or rubber parts coming out of a mold at temperatures of 400° to 600° F. can be placed directly into the boxes with no melting or deformation. Used for hot forgings, machine parts, stampings, ceramic tile parts, and other hot or heavy parts.
